

Recently my husband and I purchased a modular home. So glad we did!

We just wanted to let you know how much we are enjoying our new home. I never thought it would happen. We had a good experience from the time we started planning our home, changes we made in the process, and the setting of the home. Your entire crew was professional and delightful to work with.

Most importantly our sales representative, Mr. Kevin McGee, from the Greensburg department was the one who got us through this. I can't tell you the times I had called him about question to change things or if certain things could be done and I never waited for an answer from him. He always got back with us within an hours time. Just before we even thought about purchasing a modular home I had an uncle and aunt from out of state stop and look at modulars and let me tell you my uncle is not an easy person to talk to he is from the old school but it just so happened Kevin was also the one they talked to. My uncle said if he was moving back to PA this was the person who was going to get his sale. He never in a long time had met someone so young who treated him with respect and courtesy and didn't feel like he was wasting his time answering questions about modular homes.

I must say the day that my home was being set and to have my sales person there to see it being done was a person who takes pride in his career and the customer he has helped make a dream come true. You truly have a person to thank for making your business a success.

With pride the new homeowners,

*Mr. and Mrs. George Hobbins, Jr.
Hyde Park, PA*
